

Senior full-stack developer (Ruby on Rails/Vue.js), 80–100 %

Since our founding in 2015, Swiss Cyber Gate AG has specialized in the secure and traceable transmission of electronic data. Many well-known Swiss and international companies from various industries already rely on our transfer solutions – as on-premise installations and as cloud services. We have been part of Hostpoint AG since 2022 and are continuously developing the File Express platform.

We want to keep growing – how about you? We are looking for a senior full-stack developer for our motivated team of eight, most of whom work remotely, to start right away or on an agreed-upon date. Help us shape the future of secure data transfer!

Your responsibilities

- You will further develop our Secure File Transfer products – specifically CargoServer and the recently launched «File Express service».
- You will analyze requirements and plan the implementation and integration of new features into the software.
- You will help to continuously improve CI integration and optimize our automated tests, code analysis and build jobs.
- You will support our DevOps team in the efficient deployment of our products to customers and in cloud systems.
- You will play an active role in error analysis, performance optimization, security reviews and the refactoring of existing code.
- You will be responsible for internal projects such as technological developments, modularization and coding guidelines.

Your profile

- You have a degree in information technology or engineering or you have gained in-depth knowledge through hands-on experience as a developer.
- As an experienced developer, you have at least five years' professional experience with Ruby on Rails, Vue.js and API-based microservices and know how to build secure, scalable and modular solutions.
- You have experience with Git-based workflows, agile methods and test frameworks.
- You have a strong sense of responsibility, initiative and an autonomous way of working.
- As a senior developer, you will actively share your knowledge and act as a specialist contact person for our team.
- You are fluent in German and English.
- Knowledge of PostgreSQL, S3 API, encryption technologies or Crystal is a plus.

Job benefits

- ✓ Exciting, varied tasks with a high degree of personal responsibility
- ✓ Modern, hybrid working models (incl. working from home, workation, etc.)
- ✓ Flat rate for public transport, parking and working from home
- ✓ Costs covered for mobile phone subscriptions and contribution to sports subscriptions
- ✓ Generous budget for individual IT equipment
- ✓ Five weeks' holiday
- ✓ Support with further training
- ✓ State-of-the-art offices including a coffee bar, relaxation rooms, game rooms, etc.
- ✓ A great and strong team with a friendly atmosphere
